

I'm glad you found my Chopper Droid cube—I hope you enjoy building it! Have you seen the other Star Wars cubes? You can find them on my website, [www.KatieCoughran.com](http://www.KatieCoughran.com)

**Chopper Cube Instructions:**

1. Print on Cardstock to make it a little more sturdy
2. Cut along all solid lines. Be careful cutting around Chopper's **outer** legs. If you don't cut below them, then the cube won't fold properly. **DO NOT** cut below the middle leg as this will detach Chopper's body, which creates one side of the cube.
3. Fold all tabs down, then fold along dotted lines.
4. This Chopper makes an enclosed cube, so, looking at him on the printed side, the **far right box is the lid**. The other three outer boxes and Chopper's body make the **sides** of the cube. The **center box** will make the bottom of the cube.
5. Tape or glue your cube together, maybe with a little treat or snack inside.
6. Enjoy!
